LAKHANSING PATIL

Full-Stack Developer • Android Engineer • Gen AI & Automation

9325490236 | lakhannpatil2211@gmail.com | LinkedIn | GitHub | Nashik, India

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in **Full-Stack Development**, **Backend Engineering** and **AI-powered applications**. Proficient in **Java**, **Python**, **React**, **Node.js**, **FastAPI**, **SQL**, **AWS**, and **Databricks**. Strong foundation in **Data Structures & Algorithms**, **System Design**, **REST APIs**, and scalable software development.

WORK EXPERIENCE

Amazon | Internship — Aug 2026 - Present
Software Development Engineer — *On-site • Pune*

- Led the re-architecting of the system to handle requests for customers with over **500 addresses**, saving developers **5 hours weekly** by automating manual processes and reducing annual tickets assigned to the team by **300**.
- Contributed to a project that decreased system latency, enabling storage operations to be performed in **seconds** instead of waiting **days** for deployments and updates.
- Modernized the system by deprecating a legacy in-memory data store and integrating a more scalable solution across multiple critical APIs, enhancing monitoring with key identifiers for API metrics to improve traceability and debugging.
- Automated parts of the data processing pipeline, reducing manual intervention and streamlining operations.

Bosch India | Internship — Apr 2026 - Jul 2026
Software Development Engineer — *On-site • Nashik*

- Led a team to design and deliver a multi-agent AI system for the Quality Management (QMM1) department, automating quality audit workflows and deviation follow-ups.
- Architected four specialized AI agents: observation summarization, data-driven audit creation using the IQIS database, IATF-based process audit checksheet generation, and day-to-day LPC follow-up for sustenance.
- Integrated LPC and Q-Auditor deviation data via a SQL backend, converting raw observations into key insights, trends, and suggested actions for Level 1, 2, and 3 management through automated email reports.
- Reduced manual audit preparation and reporting effort by **12%** and improved compliance with **IATF 16949** guidelines across the department.

Google India | — May 2025 - Jul 2025
Web Dev Intern — *Remote • Bengaluru*

- Developed failure-handling strategies, including **retries with exponential backoff**, **circuit breakers**, and graceful fallbacks, resulting in a **~40% reduction** in failed requests during peak load.
- Created an IP-hashing based request distribution layer behind a proxy server, balancing traffic across **8+ backend nodes** and decreasing hot-spot overload by **~30%**.
- Implemented rate limiting and failure triggers to detect abnormal request bursts (over **10K requests/min**), automatically rerouting traffic and enhancing service availability to **99.9%**.
- Achieved a **~25% reduction** in average response latency and cut manual incident intervention by **~50%** through automated failover and monitoring.

EDUCATION

Sandip Institute of Technology and Research Centre | Nashik — Apr 2023 - Sep 2027
B.Tech in Computer Engineering — *CGPA : 8.59*

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming, System Design

PROJECTS

Locklet Pro — AI-Powered Security & Password Manager — Feb 2026 - May 2026

Built an **AES-256 encrypted password/document vault** featuring a "Lucky AI" assistant and **ML Kit OCR autofill** for intelligent input.

- Integrated secure authentication, **Cashfree payments**, premium subscriptions, and cloud backup/synchronization.
- Implemented server-side subscription-expiry enforcement to support premium-tier management for deployed users.

SKILLS SUMMARY

- **Languages:** Java, Python, C++, JavaScript, Kotlin, SQL
- **Backend Technologies:** Spring Boot, Node.js, FastAPI, REST APIs
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, DynamoDB
- **System Design:** HLD, LLD, Caching, Load Balancing, Rate Limiting, Kafka
- **Cloud & Tools:** AWS, Docker, Git, GitHub, CI/CD, Postman

AWARDS & ACHIEVEMENTS

- **1st Place** at the National Hackathon (G.H. Raisoni) for leading a team to develop an **AI-powered Smart Hospital system**.
- Co-authored a research publication on a ransomware detection and file rollback framework using **machine learning** at ICICAI ECE.
- Contributed to **3000+** open-source projects in areas including Security, AI Automation, OpenCV, and OCR.
- **Google Summer of Code 2025:** Selected by **Google** as an open-source contributor
